

Design Manual for EU organic logo and Bio Garantie group logos

1. Terms of use - EU organic logo

Conditions for application of the EU organic logo are described in regulation (EC) No 889/2008, article 57, as amended. Further details can be found here: [The organic logo | European Commission \(europa.eu\)](http://europa.eu).

The logo must be used by:

- all pre-packaged EU food products, produced and sold as organic within the EU.

Additionally the logo can optionally be used by:

- imported products where the product conforms to the EU rules on the import of organic goods;
- non pre-packaged organic products;
- EU organic products placed on third countries markets;
- as part of information campaigns intended to educate the public about the organics scheme (as long as it is not misleading or used to imply that a non-organic product fulfils the requirements of an organic product).

The logo cannot be used for:

- products containing less than 95% of organic ingredients;
- mass catering operations such as restaurants or hospitals;
- products not in the scope of organic rules such as cosmetics or products from hunting and fishing;
- products in 'conversion' (where organic methods have only just been introduced and there may still be non-organic substances in the soil or animal chain).

The EU organic logo on labels needs to be applied including the following details:

- Code number of the control body.
- Right below the code number the place of origin of ingredients needs to be indicated, as follows:
 - if all agricultural ingredients originate from a given country: for example AT Agriculture or Austria Agriculture (following indications may be replaced or supplemented in the case by a country)
 - if all agricultural ingredients originate from the EU: EU Agriculture
 - if all agricultural ingredients originate from outside of the EU: Non-EU Agriculture
 - if the place of origin of agricultural ingredients partly originate from the EU, partly not from the EU: EU/non-EU Agriculture

It is not mandatory to indicate the EU or non-EU marking in case of small weighted ingredients ($\leq 2\%$ in weight percentage of the agricultural ingredients).

Specifications regarding the application of the logo, according to regulation (EC) No 889/2008:

EU organic logo needs to match with the sample.

- 1) Reference colour is Pantone 376 green according to the Pantone colour range, or green [50% cyan + 100% yellow] in case of four-color printing.
- 2) It is also possible to apply the EU organic logo in black and white according to the pattern below, but only in case it is not possible to use the coloured one.
- 3) In case the colour of the packaging or the label's background is dark, the symbol needs to be applied in a negative format, using the background colour of the packaging or the label.
- 4) In case the coloured logo is inserted into a coloured background and therefore it is hard to see, in order to enhance the contrast the symbol can be outlined.
- 5) In case the markings on the packaging are displayed black and white, the EU organic logo can also be applied the same way.
- 6) The EU organic logo, which can be downloaded from the EU Commission's homepage in two versions (with and without a white border) needs to be at least 9 mm high and 13,5 mm wide; the height-width ratio is 1:1,5 in each case. In case of very small packagings the allowed smallest height can be reduced exceptionally to 6 mm. Both of the EU organic logos provided have a ratio of 1: 1.5, with the white border also being measured.
- 7) The EU organic logo can be accompanied with graphical or text element, but only if these amendments do not change neither the style of the EU organic logo, nor any of the markings mentioned in article 58. In case the EU organic logo is applied alongside national or private logos, which are designed in a green shade different from the reference colour described in section 2. above, the EU organic logo may be created in a colour different from the reference colour. The EU organic logo needs to be used in accordance with the registration as a trademark referring to organic production at the Benelux Office for Intellectual Property, and complying with the rules of community and national trademark register.

Pantone 376 | C050:M000:Y100:K000

Permitted black and white

Permitted negative

Marking of products with the EU organic logo not intended to be sold to final consumers:

On other labels (e.g. on products not intended to be sold to final consumers, on big-bag sacks, labels of bulk products, collective packagings) displaying the EU organic logo is not compulsory, but the code number of the control body needs to be applied for these packagings as well.

It is also suggested to display the place of origin of the agricultural ingredients according to regulation (EC) No 834/2007, article 24, as amended. If the EU organic logo is also applied to these packagings/labels, the code number of the control body and the place of origin of the agricultural ingredients also needs to be there along with it.

4. Infringement with the use

If one of the clients does not apply the EU organic logo or the Bio Garantie group logos according to the requirements included in this design manual and the general terms, the control body will send a written warning asking for the termination of the non-proper use of the logo, including the corrections expected. In case of illegal use of the logo, removal of the logo will be expected.

Depending on the severity of the infringement, we can report the case to the competent government office.

If the client still displays some of the logo illegally or not according to the requirements following the control body's written warning, further steps will be taken, which may entail legal consequences.

In case of illegal use some of the Bio Garantie / Bio Garancia logo, unless parties come to a mutual agreement, the client is obliged to pay a fine for penalty in the amount of 10% of their income from the incorrectly labelled products, but a minimum of € 1000.- This penalty does not apply for the reduction of the penalties included other legal regulations.

Besides the above ones the control body is entitled to terminate the contract in case of breach of the inspection contract.
